## OCEAN HEALTH INITIATIVES

# Your PCMH

Since 2013, OHI has been annually recognized by the National Committee for Quality Assurance (NCQA) as a Patient-Centered Medical Home (PCMH) in Ocean and Monmouth County.

At OHI, we put this model into practice by assessing the needs of a patient on a holistic basis, not simply by treating symptoms. We foster collaboration between our departments and championing general wellness in addition to specific point-of-care services. We focus on long-term health and their confidence in the healthcare system. We have assembled a team of highly skilled professionals, including physicians, nurses, physician assistants, nurse practitioners, pharmacists, nutritionists, dentists, midwives, social workers, care coordinators, and medical assistants. Together, we can address the myriad healthcare concerns of a given patient with respect to their unique needs. We have become a 'one-stop shop' for any and all health concerns. In addition, OHI collaborates with the broader healthcare system to ensure communication between patients and their various care providers.

The PCMH model has been proven to yield better health outcomes over time. In adopting this model, we demonstrate our commitment to forging a healthy and happy community for all.

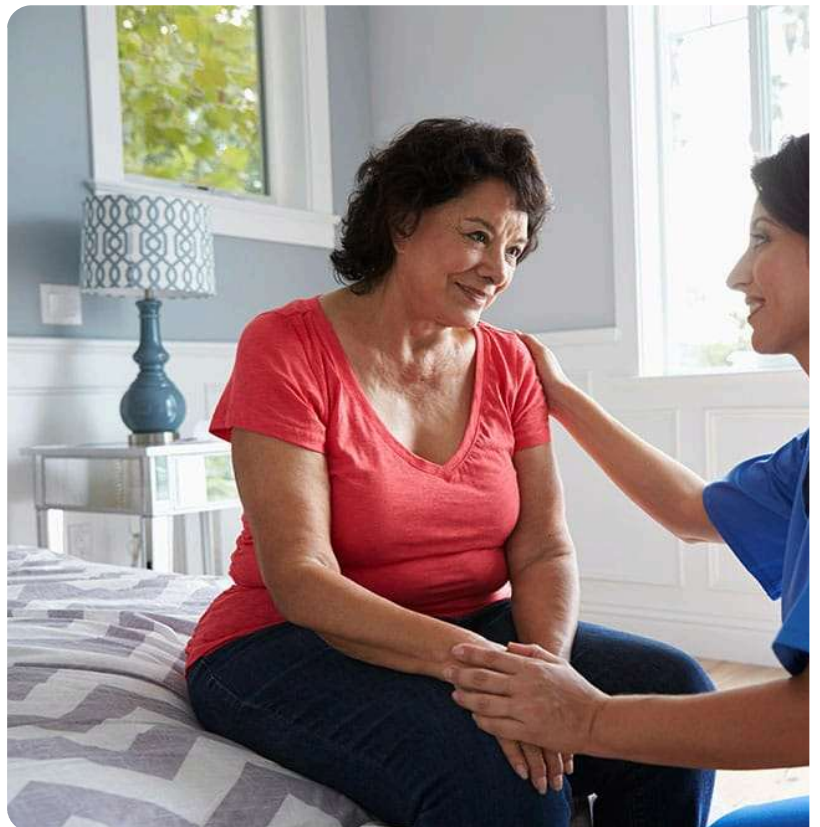

The most recent recognition of our PCMH status was awarded in December 2022 and will be updated annually.

## OCEAN HEALTH INITIATIVES

# Your Patient Centered Medical Home (PCMH)

Creating a partnership between doctors and patients while improving the health care, education, and social determinants of health.

Our Patient-Centered Medical Home (PCMH) is a health care system in which you and your family can conveniently obtain preventive services, including annual physicals, immunizations, and screenings. We also provide coordinated follow-up care if you are referred to the hospital or to another doctor.
