

Treatment Options:

Suboxone®

(Buprenorphine/Naloxone)

Suboxone is a medication used to treat opioid use disorders by reducing cravings and withdrawal symptoms.

Vivitrol® (Naltrexone)

Vivitrol is a monthly injection used to help prevent relapse in opioid and alcohol use disorders.

Our goal is to make treatment accessible, supportive, and patient-centered.

Integrated Care for Substance Use Recovery

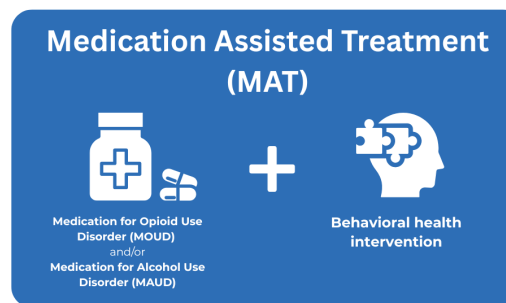

At Ocean Health Initiative (OHI), we provide compassionate, judgment-free treatment for individuals living with opioid and substance use disorders. Our Medication Assisted Treatment (MAT) program combines FDA-approved medications with counseling, behavioral health support, and care coordination to help patients safely begin and maintain recovery.

What is MAT?

Medication Assisted Treatment (MAT) is an evidence-based approach that uses medication along with counseling and support services to treat substance use disorders.

Our team works closely with each patient to create a treatment plan tailored to their individual needs and goals.

"Recovery is not about being perfect it's about taking the first step toward a healthier future."

MAT can help:

- Reduce cravings and withdrawal symptoms.
- Lower the risk of overdose.
- Improve daily functioning and quality of life.
- Support long-term recovery
- Reduce relapse risk.
- Lowering the risk of overdose.
- Providing access to counseling and mental health support.
- Helping patients rebuild healthy routines and relationships.

HOW MEDICATION-ASSISTED TREATMENT WORKS
